Secretary O'Connor of the local union when seen today said: "We are to a man opposed to any change in the present law. At our quarterly meeting in June we adopted resolutions with an unanimous vote in which we declared that the present commission was doing a helpful work, and that any change would be a step backward. If a one-headed commission be created, we are afraid that the duties of the commission as named in the law itself will be neglected."

The resolutions were sent to Secretary Haupt of the State Barbers' Association, and were then sent to Hartford. The present commission has investigated many shops in the State and found some in a very unsanitary condition, and has then reported to the State Board of Health, which has seen to the abolishment of such places. The journeymen barbers are decidedly in favor of the license law which prevents the cheaper grade of labor from coming into the State without first appearing before the commissioners for examination.

It is said that Peter Hummel of this city, who was one of the commissioners for a term of two years, but who failed to receive a reappointment, is an ardent supporter of the bill abolishing the present commission, and that he favors a one-headed commission. He has been mentioned for that office, should it be created.

RESULT OF WITHDRAWAL OF FOUR POWERS FROM ADMIN-ISTERING GOVERNMENT OF CRETE

Official German Information

Turkey Already Moving Troops To wards Grecian Frontier, Forces Hav ing Concentrated at Canea-Mohar medan Inhabitants of Crete Say

They Are in Danger of Massacre. (Special from United Press) Berlin, July 9 .- According to authoritative information from the German Foreign Office, advices have been re ceived from representatives of the Fatherland in Constantinople, Canea and Athens, to the effect that withdrawal of the four powers-Germany, England, France and Italy-who have administered the government for the past twelve years, from Crete, will result in a bloody war between Turkey and Greece. Turkey is already moving troops toward the Grecian frontier, a force whose strength is merely speculative having concentrated at Canea. Formal notes outlining the status of Crete have been prepared for transmission to the Turkish and Greek governments. These insist that the present position of Crete be maintained. The Turks, however, feel that the surrender of their claim over Crete would endanger the present government and in Greece it is understood that if Crete's demand for a union with the Hellenes is disregarded, the downfall of King George's dynasty is almost a certainty. Neither government, even though it consider defeat inevitable, is likely to deem it safe to hesitate.

At present indications are that there will be fighting both on the mainland and in Crete. Both Greece and Turkey are and have been for weeks concentrating troops on the Sassallan body. The Mohammedan inhabitants of Crete numbering about 30,000 out of a total population of 300,000 say they past twelve years, from Crete, will reof Crete numbering about 30,000 out of a total population of 300,000, say they are already in momentarily danger of

BILL LIMITING SALOONS PASSED SENATE TODAY

(Continued from First Page.)

It became known to-day that the committee has again undergone a change of heart. First it was given change of heart. First it was given out that the committee had but one report to make and that was to be in favor of a repeal of the existing statute. But the electric lighting lobby never gave up. They went right at the thing and they apparently have not labored in vain. It is said upon the authority of one of the committee that what will be done is this. The that what will be done is this. The existing statute will be wiped out and a substitute measure introduced where-by it will be lawful for any terson to manufacture electricity for his own use and he may even sell it to his immediate neighbors providing, how-ever, that he can not like the electric light companies use any portion of the highways for the purpose of disposing of his surplus current to a neighbor across the street from him. Mr. A. M. Cooper of the Howland Dry Goods company of Bridgeport, was at the capitol to-day and he busied himself by making diligent inquiry as to what was back of the delay upon the repor

of the bill.

The Senate voted \$60,000 for an arm-The Senate voted \$60,000 for an armory at Stamford. It passed a law prohibiting the taking of shell fish from Sherwood's mill pond at Westport. It passed a bill which creates a new office that will be filled by some lawyer at an annual salary of \$2,500 and whose duty it will be to inquire into the antecedents of indegent persons who are being kept at the expense of towns. An appropriation of \$50,000 for an armory at Torrington was passed.

was passed.

The House yesterday passed over the head of the Rallroad committee which reported adversely a bill providing for a 5 cent trolley fare within the con-fines of Huntington, and as it did not reconsider its action today the matter will now go to the Senate where it is likely it will receive a solar plexus. The House today appropriated \$250,000 for a State institution for epileptics, the expense of maintaining to be borne by taxes levied in the towns having patients at the institution.

patients at the institution.

As was expected the Judiciary committee reported unfavorably upon the bill calling for a reduction in the night telephone rates. The House rejected the unfavorable report of the committee and ordered the bill tabled for calendar. Representative Johnson of Newtown is one of the aggressive members of the House who is fighting hard to get the telephone rates reduced and he has the support of many of the able members of the body.

As was anticipated the committee on Public Health and Safety reported a bill abolishing the State Barbers' Examining Commission.

CONFESSED BIGAMIST HAS MANY WIVES
